ABOUT THE PROGRAM

This is a unique opportunity to be exposed to the collegiate level of soccer. Training sessions are led by a former college coach (head coach at NCAA-I, NCAA-II, and NAIA) – where players have the chance to experience the intensity and level of play expected in that environment (daily activities include two training sessions). The camp features a "college soccer talk", which is a seminar where players are given an overview of the college soccer landscape, and also offer tips on the recruiting process. This camp is about advanced training with emphasis on the tactical aspects of the game (offensive/defensive principles and transition). Yet, as the Brazilian philosophy dictates, the fundamentals of the sport are also highly emphasized.
